Description de l'université :

North China University of Water Conservancy and Electric Power (also referred to as North China University of Water Resources and Electric Power, or simply NCWU. i.e. Chinese: 华北水利水电学院; pinyin: Huáběi Shuǐlì Shuǐdiàn Xuéyuàn) is a teaching and research university established in 1951 and is now located in Zhengzhou, Henan Province. Co-sponsored by the province and the Ministry of Water Resources, NCWU is a full-time public university specializing in the field of water resources and hydropower, with engineering as a key program, multidisciplinary subjects developing constantly and coordinately, ranging from science, agriculture, economics, management, art to law.

NCWU is ranked as "Excellent" in the Evaluation on Undergraduate Teaching Level conducted by the Ministry of Education, which is also the backbone university enjoying priority support from Henan Province. NCWU mainly recruits full-time undergraduate and graduate students together with a small number of three-year diploma students.
